Project :-

[DeepFake Detection System](#):-

Developed a full-stack DeepFake Detection System using React.js, Node.js, and MongoDB with a TensorFlow-based ML model for video classification. The frontend handles video uploads and displays detection results, while the backend processes requests, performs face extraction (using OpenCV and MTCNN), and classifies videos as real or fake.

[Spotify Clone](#):-

Built a responsive **Spotify Clone** using **HTML and CSS**, replicating the core layout and styling of the Spotify web player. This project enhanced my front-end development and UI design skills.
